

The logo for Vexoderm, featuring the word "Vexoderm" in a blue sans-serif font. The letter "V" is significantly larger and bolder than the other letters.The logo for PhytoTreat, with "Phyto" in green and "Treat" in black. Below "Phyto" is the tagline "Naturally Better" in a smaller black font.

WEBINAR INVITATION

ADVANCED MOIST WOUND HEALING

VEXODERM ANTIOXIDANT TREATMENT

Free radicals not welcome!

Generally in wounds, an acute inflammatory response occurs, and large amounts of free radicals are generated, which must be controlled in order to activate new granulation tissue formation and wound closure.

Vexoderm is designed to adequately manage the level of free radicals and to create a moist wound environment.

In this webinar you will learn more about moist wound healing and the antioxidant mechanism.

JULY

14

20:00 - 21:00

This free webinar is offered to you by PhytoTreat BV, Benelux distributor of Vexoderm, in collaboration with ArtinVet. The webinar is in English and by following it completely 1 CPD creditpoint is obtained.
